University of Illinois at Chicago

Research Study:
Interdisciplinary Studies of Insistence on Sameness in Autism Spectrum Disorders
(protocol #2007-0239)
Principal Investigator:
Edwin Cook, Jr., M.D.

We are currently recruiting families that have an individual with an

Autism Spectrum Disorder (ASD)

for a research study investigating brain disorders and the genetics of autism.

To qualify, the individual with ASD must be between 3 and 35 years of age.

Eligible families will be asked to participate in some or all of the following:

- interviews for diagnosis and family history
- standardized cognitive and neuropsychological assessments
- standardized social and communication assessments
- several short questionnaires
- genetics testing
- brain imaging studies with MRI
- medication treatment

Your participation would require multiple visits.

The testing will be conducted at the
Institute for Juvenile Research
1747 W Roosevelt Road
Chicago

If you are interested in learning more about this study and how to participate, please contact **autism@uic.edu or (312) 413-4624**. A research team member will then contact you with further information and discuss this study in detail. If you are under 18, you need parental permission to participate.
